EDUCATION

Pune Institute of Computer Technology

Pune Dec. 2021 – June 2025

Bachelor of Engineering, Information Technology

Current CGPA:- 9.56

EXPERIENCE

Software Engineering Intern

June 2024 – July 2024

MasterCard

- Worked on production grade project named Flexi Reports and contributed to front-end using Vue Framework, typescript
- Made significant contributions to live project by collaborating with the entire team
- Experienced complete SDLC life cycle with Agile Methodology, Development, Testing, Deployment, Team Building

Flutter Developer Intern

Nov 2022 - Feb 2023

Pune Institute of Computer Technology

View Certificate

- Worked on app Krishak Farma related to farmers
- Implemented sign-in, sign-up, and forget password using Firebase and other back-end work
- Worked on location auto fill using places API.

ACHIEVEMENTS

COEP Inspiron Hackathon 2nd Runner up

View Certificate

• Won 3rd Prize among 200+ teams from overall India under Machine Learning Category

Smart Pune Health Hackathon Special Prize winner

View Certificate

• Won Special Prize under category automating data entry and processing among 200+ teams from overall India

Solved 500+ Problems on Leetcode

View Profile

TECHNICAL SKILLS

Core Subjects: DSA, DBMS, OOP, OS, CNS

Machine Learning: PCA, Data Visualization, Preprocessing, Regression, Classification

Languages: C++, Java, SQL(MySQL)

Frameworks: Vue, Node Js, Flutter, Firebase, Flask

Developer Tools: Git, Github, Postman, Android Studio, VS Code **Libraries**: Pandas, NumPy, Matplotlib, Scikit-Learn, Seaborn,

Projects

Health-Plus | Flutter, Flask, Firebase, Easy-OCR, Random-Forest classifier

View Project

- Developed a mobile app to automate the process of filling medical health records from health reports into government database
- Also predicted the probability of 5 diseases from available data using random forest classifier
- Got special prize from Pune Municipality Corporation for developing the solution during Smart Pune Health Hackathon

Visa Chat-bot | Flutter, Flask, Firebase, TensorFlow, NLP

View Project

- Developed a custom chat-bot using NLP and TensorFlow DNN architecture to solve visa related queries
- Integrated the chat-bot to a Flutter app and also implemented a recommendation system based on users chat and speech to text feature using flutter package
- Developed entire project during 24hr hackathon conducted by COEP CSI and won 3rd Prize among 200+ teams

Training and Placement Cell Application | Flutter, Firebase

View Project

- Developed a mobile app to help 3rd year and 4th year students to get real time internship and placement updates
- Implemented forget password feature, user authentication, and back-end integration using Firebase
- Admin login to get real-time statistics and upload the updates.
